memorandum

Rocky Flats Office

DATE: APR 23 1991

REPLY TO: ERD SG 3032

ATTN OF:

SUBJECT: Redefinition of Individual Hazardous Substance Site No 155

TO: J M Kersh, Associate General Manager
Environmental Restoration and Waste Management
EG&G Rocky Flats, Inc

APR 26 1991

Individual Hazardous Substance Site (IHSS) No 155, the 903 Pad Lip site (Operable Unit No 2) delineates the area of radionuclide contaminated soils as a result of wind redistribution and as a result of attempted remediation efforts. Since delineation of this IHSS, a larger area east of the 903 Pad and the security fence has been shown to contain significant radionuclide soil contamination. As a result, the IHSS boundary should be revised to include the area extent of radionuclide contamination.

Please evaluate revision of the IHSS 155 boundary and respond within three weeks.

If you have any questions, please contact Scott Grace of my staff at extension 7199.

David P. Simonson
Assistant Manager
for Environmental Management
